T-CARE MANAGED SERVICES (MS) PLANS

Rules and Conditions:

T-CARE MS plans require a written agreement and prepayment for the level of service requested. Additional services billed are Net 30 Terms. TSL/TNX currently uses Level Platforms Managed Workgroup on a hosted platform as its management engine. T-CARE GOLD PLUS requires minimum hardware and software platform for service eligibility (including 1 Windows Server 2008). Upgrades may be needed to qualify for GOLD PLUS. TSL/TNX reserves the right to switch to another platform at any time. There is a \$250 setup fee (1 time) required to begin service. The customer understands that TSL/TNX will use its best efforts to meet the customer's needs. Extra services are billed in accordance with local market practices. Fees prepaid are not refundable or returnable if the customer cancels this relationship before the end of the agreement. Services do not include any hardware or software required for the resolution of any issue. Customer acknowledges that they know and understand some issues may require a change in business practices for resolution. TSL/TNX will attempt to offer the customer the BMP solution available for their situation. TSL/TNX is not responsible for the outcome or performance of the network or a component if the customer declines that BMP solution. Services not used are not refundable and expire at the end of the term. The standard sales policy of TSL/TNX applies to any plan undertaken here. Remote monitoring and management requires access to network, management account, and passwords from an outside location.

Services provided by TechNET Express Group! of Tallgrass Systems Ltd.
